**DETAILED ACTION*****Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-7 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-13 of allowed copending Application No. 10/507,903. Although the conflicting claims are not identical, they are not patentably distinct from each other because the inorganic particles can be fumed silica. See paragraphs 0081-0085.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

3. Claims 1-7 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-8 of copending Application No. 10/504,297. Although the conflicting claims are not identical, they are not

Art Unit: 1714

patentably distinct from each other because the inorganic compound can be fumed silica. See paragraph 0173.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Claim Rejections - 35 USC § 102***

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

5. Claims 1-5 and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Hirai et al. 6,664,313.

6. Hirai et al. disclose all ingredients claimed by applicants and the concentrations disclosed encompass applicants' claimed amounts. A reference is not limited to its Illustrative Examples. See In re Fracalossi, 215 USPQ 569-570 (CCPA 1982). The rejection is maintained.

***Claim Rejections - 35 USC § 103***

7. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

8. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hirai et al. 6,664,313 or Rajagopalan et al. 6,518,357, in view of Hoover 6,072,011 or Allen et al. 4,544,677.

9. Hirai et al. has been discussed already. Additionally Hirai et al. disclose glass fibers in column 10, line 13, without specifying the amount to be used. Rajagopalan et al. teach polycarbonate, PTFE, fumed silica and KSS in Table 2. The KSS

Art Unit: 1714

concentration is outside the limits of applicants' claims, however the patent also teaches 0.1% potassium perfluorobutyl sulfonate which can be substituted for KSS. Picking and choosing is permitted in obviousness rejections. See *In re Arkley* 172 USPQ 526 (CCPA 1972). The reference also teaches 1-100 parts of glass fibers in column 7, lines 20-40. The secondary references are used only to show that using glass fibers, as fillers, in the concentration claimed in claim 6, would have been obvious to one having ordinary skill in the art; at the time the invention was made. Applicants are arguing against an anticipation rejection, when the instant rejection is for obviousness. The rejections are maintained.

### ***Drawings***

10. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application. See Notice of Draftsperson's Patent Drawing Review dated 8/10/05 (enclosed for the second time).

### ***Conclusion***

11. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1714

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
